

Assignment No: 01

Q. Create a HTML Page with all the formatting Tags

Source Code:-

```
<!DOCTYPE html>
<html xmlns="http://www.w3.org/1999/xhtml">
<head>
<title >
    The Shivaji University
</title>
</head>
<body style="margin:50px">
<div>
<h1 style="text-align:center;font-size:30px;font-weight:bold">
    The Shivaji University
</h1>
</div>
<p>
<u><b>Shivaji University</b></u>, established in 1962, is named after the Great Maratha Warrior
and founder of <b><i><big>the Maratha empire Chhatrapati Shivaji Maharaj</big></i></b>.
It was inaugurated on <sup>18th November 1962</sup> by <strong>Dr. Radhakrishnan, the then
President of India</strong>. One of the major objectives behind foundation of this University was
to cater to the regional needs of South Maharashtra.
The jurisdiction of the University is spread over three districts viz. <del>Kolhapur, Sangli and
Satara</del> with strength of about <sub>3,00,000</sub> students studying in
<sub>280</sub> affiliated colleges and recognised institutes.
This region of Maharashtra boasts of rich and varied socio-cultural heritage. Under the innovative
and socially reformist <em>leadership of Chhatrapati Shahu Maharaj</em>,
the princely ruler of Kolhapur, <small>the city had become at the beginning of this
century</small>, a focal point of educational opportunities for all classes and communities of
South-Western Maharashtra, and northern parts of neighbouring Karnataka.
This is also land of Karmaveer Bhaurao Patil, who struggled for taking education to the masses by
his innovative <mark>'Earn and Learn'</mark> scheme.
</p>
</body>
</html>
```

Output:-

The Shivaji University

Shivaji University, established in 1962, is named after the Great Maratha Warrior and founder of *the Maratha empire Chhatrapati Shivaji Maharaj*. It was inaugurated on 18th November 1962 by **Dr. Radhakrishnan, the then President of India**. One of the major objectives behind foundation of this University was to cater to the regional needs of South Maharashtra. The jurisdiction of the University is spread over three districts viz. ~~Kolhapur, Sangli and Satara~~ with strength of about 3,00,000 students studying in 280 affiliated colleges and recognised institutes. This region of Maharashtra boasts of rich and varied socio-cultural heritage. Under the innovative and socially reformist *leadership of Chhatrapati Shahu Maharaj*, the princely ruler of Kolhapur, the city had become at the beginning of this century, a focal point of educational opportunities for all classes and communities of South-Western Maharashtra, and northern parts of neighbouring Karnataka. This is also land of Karmaveer Bhaurao Patil, who struggled for taking education to the masses by his innovative 'Earn and Learn' scheme.

Q. Create a HTML Page containing Table Tags

Source Code :-

```
<!DOCTYPE html>
<html xmlns="http://www.w3.org/1999/xhtml">
<head><table, th, td { border: 1px solid black;}</head>
<body></body>
<center><p><big><b>Student Information</b></big></p></center>
<table style="border: 1px solid black;margin-left:auto;margin-right:auto;">
<tr><th>Stu_id</th>
<th>Stu_Fname</th>
<th>Stu_address</th>
<th>Phone No</th>
<th>Email</th></tr>
<tr><th>1</th>
<th>Sakshi Jadhv</th>
<th>Pune</th>
<th>7896321450</th>
<th>sakshi@gmail.com</th></tr>
<tr><th>2</th>
<th>Avdhoot Kadam</th>
<th>Sangli</th>
<th>5236987413</th>
<th>a@gmail.com</th></tr>
<tr><th>3</th>
<th>Ashitosh Shinde</th>
<th>Tasgoan</th>
<th>9860681631</th>
<th>ashi@gmail.com</th></tr>
<tr><th>4</th>
<th>Meera Sawant</th><th>Satara</th><th>9862671631</th>
<th>meera@gmail.com</th></tr>
<tr><th>5</th>
<th>Vaibhav Mali</th>
<th>Kohlapur</th>
<th>9960681640</th>
<th>v@gmail.com</th></tr>
</table></body></html>
```

Output :-

Student Information

Stu_id	Stu_Fname	Stu_address	Phone No	Email
1	Sakshi Jadhv	Pune	7896321450	sakshi@gmail.com
2	Avdhoot Kadam	Sangli	5236987413	a@gmail.com
3	Ashitosh Shinde	Tasgoan	9860681631	ashi@gmail.com
4	Meera Sawant	Satara	9862671631	meera@gmail.com
5	Vaibhav Mali	Kohlapur	9960681640	v@gmail.com

Assignment No – 03

Q. Create a HTML Page and apply a CSS to the page.

Source Code:-

```
<!DOCTYPE html>

<html xmlns="http://www.w3.org/1999/xhtml">
<head><body >
<div >
<div class="title" style="text-align:center">
<h1>Login Page</h1></div>
<div style="border:2px solid black;border-radius:10px;height:400px;width:700px;margin-left:400px;background-color:lightgoldenrodyellow">
<div style="display:inline-block;height:99%;width:45%;">

<h2 style="margin:200px 0px 0px 110px">John Doe</h2></div>
<div style="display:inline-block;height:99%;width:52%;position:absolute">
<h1 style="margin-left:90px">Welcome</h1>
<div style="padding:20px">
<div style="margin-bottom:30px">
<label style="margin-right:60px">UserName:</label>
<input type="text" name="Name" /></div>
<div style="margin-bottom:70px">
<label style="margin-right:68px">Password:</label>
<input type="password" name="Name" /></div>
<div>
<input id="Checkbox1" type="checkbox" />
<label>accept <a href="">terms & Conditions</a></label></div>
<div style="margin:50px 0px 0px 100px;">
<input type="submit" value="Login" style="height:40px;width:110px;border:none;background-color:lightblue;border-radius:5px;font-weight:bold"/>
</div></div></div></div></div></div></body></html>
```

Output:-

Login Page

John Doe

Welcome

UserName:

Password:

Assignment No – 08

Q. Design a webpage demonstrating the use of webservices

Source code:-

▪ WebService1.asmx.cs

```
using System;
using System.Collections.Generic;
using System.Linq;
using System.Web;
using System.Web.Services;
namespace WebTechJournalQue8
{ public class WebService1 : System.Web.Services.WebService
    { [WebMethod]
      public int Add(int x,int y)
      {
          return (x+y);
      } [WebMethod]
      public int Subtract(int x, int y)
      {
          return (x - y);
      } [WebMethod]
      public int Multiply(int x, int y)
      {
          return (x * y);
      } [WebMethod]
      public int Divide(int x, int y)
      {
          return (x / y);
      } } }
```

▪ Form1.cs

```
using System;
using System.Collections.Generic;
using System.ComponentModel;
using System.Data;
using System.Drawing;
using System.Linq;
using System.Text;
using System.Threading.Tasks;
using System.Windows.Forms;
using WindowsFormsApp1.ServiceReference1;
namespace WindowsFormsApp1
{
    public partial class Form1 : Form
    {
        WebService1SoapClient obj;
        public Form1()
        {
            InitializeComponent();
        }
        private void button3_Click(object sender, EventArgs e)
        {
            int a = Convert.ToInt32(textBox1.Text);
            int b = Convert.ToInt32(textBox2.Text);
```

```

        int ans = obj.Multiply(a, b);
        MessageBox.Show("Multiplication of number is : " + ans);
    }
    private void button4_Click(object sender, EventArgs e)
    {
        int a = Convert.ToInt32(textBox1.Text);
        int b = Convert.ToInt32(textBox2.Text);
        int ans = obj.Divide(a, b);
        MessageBox.Show("Division of number is : " + ans);
    }
    private void button1_Click(object sender, EventArgs e)
    {
        int a = Convert.ToInt32(textBox1.Text);
        int b = Convert.ToInt32(textBox2.Text);
        int ans = obj.Add(a, b);
        MessageBox.Show("Addition of number is : " + ans);
    }
    private void Form1_Load(object sender, EventArgs e)
    {
        obj = new WebService1SoapClient();
    }
    private void button2_Click(object sender, EventArgs e)
    {
        int a = Convert.ToInt32(textBox1.Text);
        int b = Convert.ToInt32(textBox2.Text);
        int ans = obj.Subtract(a, b);
        MessageBox.Show("Substraction of number is : " + ans);
    }
}
}

```

Output:

The screenshot shows a Windows application window titled "Form1". Inside the window, there is a section titled "WebService Example". Below this title, there are two text boxes: "Number1" containing the value "3" and "Number2" containing the value "4". Underneath these text boxes are four buttons: "Add", "Subtract", "Multiply", and "Divide". The "Multiply" button is currently selected, indicated by a blue border. In the bottom right corner of the main window, a small message box is open, displaying the text "Multiplication of number is :12" and an "OK" button.

AssignmentNo – 09

Q. With a Fields given below create a database table and insert a few record using C#

windows forms application (id, person_name, age, dob,gender)

Source Code:-

```
using System;
using System.Collections.Generic;
using System.Linq;
using System.Web;
using System.Web.UI;
using System.Web.UI.WebControls;
using System.Data;
using System.Data.SqlClient;

public partial class Person_Info : System.Web.UI.Page
{
    String Gender;
    SqlConnection cn = new SqlConnection("Data
source=RUTUJA\\SQLEXPRESS;InitialCatalog=Practical;Integrated Security=True");

    protected void Page_Load(object sender, EventArgs e)
    { }

    void ClearControls()
    {
        TextName.Text = string.Empty;
        TextAge.Text = string.Empty;
        TextDOB.Text = string.Empty;
        Gender = string.Empty;
    }

    protected void Button1_Click(object sender, EventArgs e)
    {

        cn.Open();
        SqlCommand cmdId = new SqlCommand("select isnull (max(Id),0)+1 from Person_Info", cn);
        HiddenField1.Value = cmdId.ExecuteScalar().ToString();
        cn.Close();

        cn.Open();
        SqlCommand cmd = new SqlCommand("insert into
Person_Info(id,Person_Name,Age,DOB,Gender)Values(" + Convert.ToInt16(HiddenField1.Value)
+ "," + TextName.Text + "," + TextAge.Text + "," + Convert.ToDateTime(TextDOB.Text) + "," +
+Gender + ")", cn);
        cmd.ExecuteNonQuery();
        cn.Close();

        Response.Write("<script language='javascript'>alert('Record SavedSuccessfully...')</script>");
    }
}
```

```

ClearControls();

}
protected void RadioButtonList1_SelectedIndexChanged(object sender, EventArgs e)
{
    Gender=" Male";
}
protected void RadioButtonList2_SelectedIndexChanged(object sender, EventArgs e)
{
    Gender=" Female";
}
protected void RadioButtonList3_SelectedIndexChanged(object sender, EventArgs e)
{
    Gender=" Others";
}
}

```

Output :-

Personal Information

Persons Name :

Age :

DOB :

Gender :

☐ Male
☐ Female
☐ Others

id	Person_name	Age	DOB	Gender
1	Harsh Shinde	34	1990-11-12	Male
2	Prisha Mehara	22	2002-01-05	Female
4	Swati Jadhav	28	1993-05-01	Female
3	Karan Bhosale	22	2002-01-09	Male
5	Shiv Patil	25	1995-06-12	Male

Assignment No –10

Q. Create a project with the functionality of state management

Source Code:-

```

            Response.Redirect("LoginPage.aspx");
        }
    }
}
```

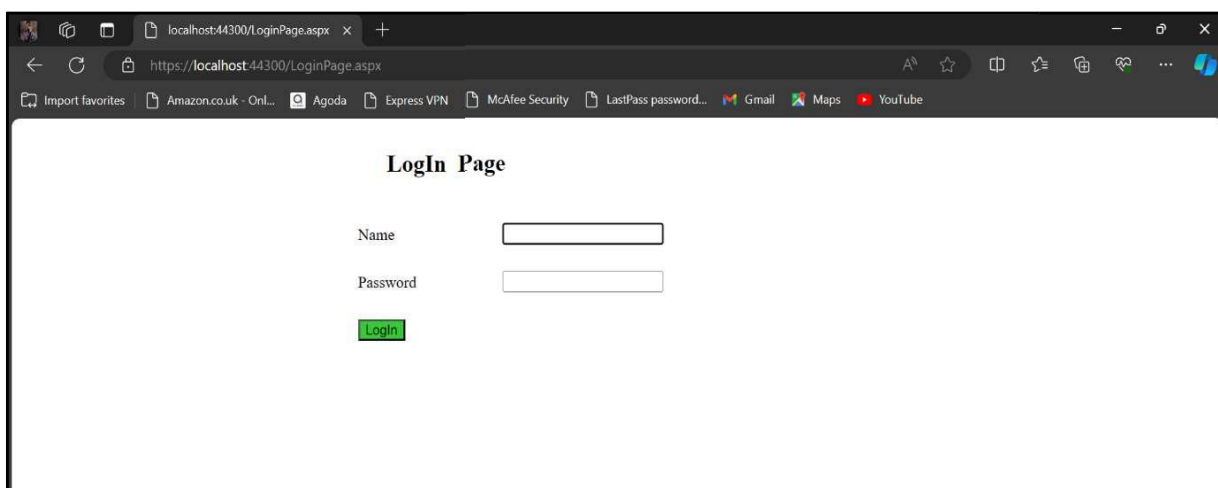

} } }
Output:

❖ User Registration

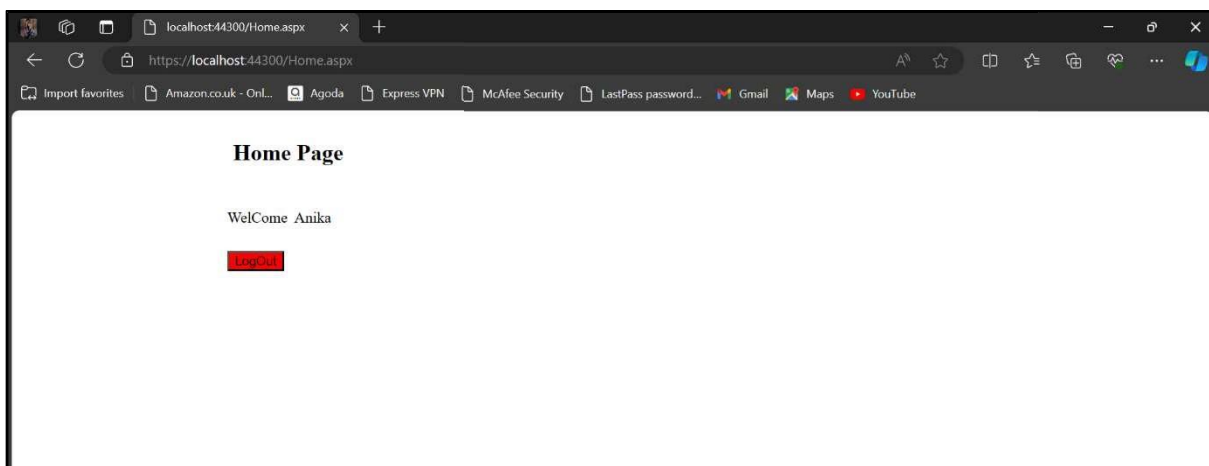

A screenshot of a web browser displaying the 'User Registration' page at https://localhost:44300/User_Registration.aspx. The page contains a registration form with the following fields: Name, Address, Mobile No, Email, DOB, Programme (a dropdown menu currently showing 'MCA I'), Marks, District (a dropdown menu currently showing 'select'), and Password. At the bottom of the form are four buttons: 'Save', 'Update', 'Delete', and 'Go to Login'.

❖ LogIn Page

A screenshot of a web browser displaying the 'LogIn Page' at <https://localhost:44300/LoginPage.aspx>. The page has a title 'LogIn Page' and contains a login form with fields for 'Name' and 'Password'. Below these fields is a green 'Login' button.

❖ Home Page

A screenshot of a web browser displaying the 'Home Page' at <https://localhost:44300/Home.aspx>. The page has a title 'Home Page' and displays the text 'WelCome Anika'. Below this text is a red 'Logout' button.

Assignment No :- 11

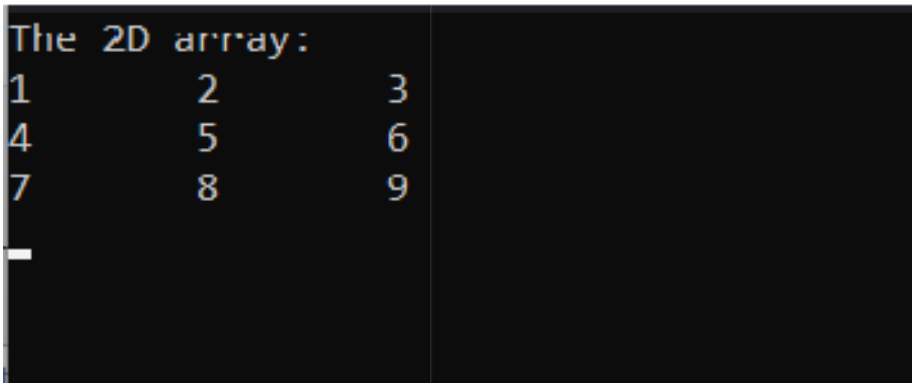

Q. Write a program which demonstrates a 2D array using C# console application.

Source Code:-

```
class Program
{
    static void Main(string[] args)
    {
        // Example 2D array
        int[,] array2D = {
            {1, 2, 3},
            {4, 5, 6},
            {7, 8, 9}
        };

        // Display the 2D array
        Console.WriteLine("The 2D array:");
        for (int i = 0; i < array2D.GetLength(0); i++)
        {
            for (int j = 0; j < array2D.GetLength(1); j++)
            {
                Console.Write(array2D[i, j] + "\t");
            }
            Console.WriteLine();
        }
        Console.ReadKey();
    }
}
```

Output :-

A screenshot of a console window with a black background and white text. The text displays the output of the C# program: "The 2D array:" followed by a 3x3 grid of numbers. The numbers are arranged in three rows and three columns, separated by tabs. The first row contains 1, 2, and 3; the second row contains 4, 5, and 6; and the third row contains 7, 8, and 9. A white cursor is visible on the line following the last row of numbers.

```
The 2D array:
1       2       3
4       5       6
7       8       9
_
```

Assignment No :- 12

Q. Write a program to store student registration data using the fields given below and provide the facility of update and delete. (id, name, age,email,password)

Source Code:-

```
using System;
using System.Collections.Generic;
using System.Linq;
